1 Week 9 Assignment

1.1 Problem 1

In the cell below, create a while loop that will only run once.

```
[ ]: num = 1

while num <= 1:
    print("Hello World!")
    num = num +1
```

Hello World!

1.2 Problem 2

In the cell below create a while loop that will run forever.

```
[ ]: num = 1

while num >= 1:
    print("Hello World!")
    num = num +1
```

1.3 Problem 3

In the cell below, create a for loop that will print out the odd numbers between 1 and 20 (in order).

```
[14]: for number in range (1,20):
        if number % 2 != 0:
            print(number)
```

1.4 Problem 4

In the cell below, use a for loop to print out the letters in “washingtonian” with one letter on each line.

```
[10]: for x in "washingtonian":  
      print(x)
```

1.5 Problem 5

In the cell below create a for loop that prints out the numbers from 1 to 30 (in order), except if the number is divisible by 3 instead print “WSU”, if it is divisible by 5 instead print “Cougars”, and if it is divisible by 15 instead print “WSU Cougars”.

```
[21]: for number in range (1,31):  
      if (number % 15 == 0):  
          print("WSU Cougars")  
      elif (number % 3 == 0):  
          print("WSU")  
      elif (number % 5 == 0):  
          print("Cougars")  
      else:  
          print(number)
```
